FEC HAS HARD RESET

BEFORE to close the battery compartment and with the lock on, the following must be done **RESET manual** of the same.

To do this, simply **press** the button **RESET** continuously during **5 seconds**, until the lock makes a sound. Then, type **"000000#"** on the exterior panel keypad. The reset process is complete and the lock is ready to be paired.

If the lock disconnects (e.g. incorrectly placed batteries come out of place), the process will have to be repeated).
