## Electronic Lock Standalone or APP Code and Card

iOS

ATTENTION:

Please read the manual carefully before installation and keep it for future use.

Keep the mechanical keys in a safe place to be able to open the door mechanically in case there is an emergency or if the lock breaks down.

Pay attention to the battery level in order to replace the batteries in time.

Factory Reset

Reset Button

DELETE ALL SETTINGS AND USER CARDS/CODES

BEFORE completely assembling the lock, we advise to do a **MANUAL RESET.** The RESET button is located inside the front panel - to access it you will have to dismantle the back of the front panel, put the batteries and connect both panels using the power cable. To do the RESET, just press the **RESET** button continuously for **5 seconds** until the lock emits a sound. Then enter **"000#"** on the keypad on the exterior panel. The reset process is complete and the lock is ready to be paired.

Operating Mode:
Standalone or Bluetooth

- The lock works either as a standalone device controlled by keyboard functions or by Bluetooth connection. If the device is set to work standalone, the Bluetooth is deactivated and if it set to work by Bluetooth (APP) you cannot use the keyboard functions. Factory reset and choose the operation mode you wish;

- The factory default code is "**123456**";

- The Administrator master code cannot be deleted unless the lock is factory reset.
